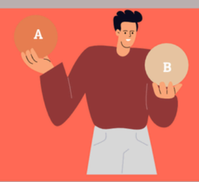
Estalv-IA App

1. The Opportunity

- People struggle to save money consistently
- Lack of awareness about spending habits
- Budgeting is confusing and time-consuming

Need: A simple way to manage money
Clear insights into spending and income
Guidance on how much to save

The Opportunity:
Create an app that analyzes income and expenses
Provide personalized saving recommendations automatically



8. Design Principles

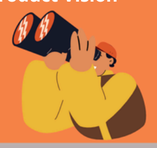
1. Simplicity
2. Transparency
3. Automation

The app must be easy to understand and use from the first interaction.

Users must clearly understand their financial situation and how the app works.

The app should reduce manual effort by automating financial tracking and decisions.

9. Product Vision



The Estalv-IA App aims to transform the way people manage their finances by turning saving money into a simple, intuitive, and accessible experience for everyone. It seeks to eliminate the complexity and stress associated with budgeting by providing personalized guidance based on each user's income and spending habits. By automating financial decisions and offering clear insights, the app empowers users to take control of their money effortlessly, improving their financial well-being and long-term stability.
